## GRAB YOUR FIELD JOURNAL & LET THE ADVENTURE BEGIN!

In this hands-on traveling exhibit, kids are the field scientists and Earth's biomes are ready to be explored!

### VISITOR AND EDUCATOR APPEAL

Visitors are immersed in each biome and take on the role of a field scientist as they experience first-hand the habitats, eco-systems, wildlife, diversity, and adaptations within each unique environment.

- More than 30 hands-on activities
- Includes authentic specimens and engaging environments
- True-to-life scientific research

Join Riley in the research tents, which offer visitors access to the tools and equipment used on location by real field scientists.

- Learn how to record, analyze, and interpret data
- Use binoculars, compasses, microscopes and more
- Measure, weigh, collect, and compare
- Identify plants and animals
- Peek, poke, prod, and ponder!

### RELEVANCE

Education is the key to saving the world's critical habitats and the animals that live in them. In this interactive and innovative exhibit based on the popular book series, visitors explore major biomes of Earth, and actively learn about how field scientists work to save and protect life on our amazing planet.

- 84% of elementary educators nationwide agree that it is important for schools to teach children about the environmental issues that confront us today.\*
- 77% of elementary educators nationwide feel that **Adventures of Riley®** is appropriate for the elementary science curriculum.\*

\* Results of November 2003 National Survey of Elementary Educators conducted by Greenfield Research Group.

### EXHIBIT RENTALS

Adventures of Riley: Biome Trek is available for three-month bookings to qualified museums and science centers. Tiered content is intended for mixed-age family audiences.

- 5,000 square feet
- Supplemental education materials and marketing materials are included
- Standard HVAC and electrical requirements
- 12-foot ceiling preferred; 9-foot ceiling required
